

Adam Elaoumari

CYBER SECURITY ANALYST

Profile

Future University of Kent and EPITECH graduate, I'm transitioning into the cybersecurity realm. I have hands-on foundation at EPITECH and in the entrepreneurial work, as a co-owner of Dealcover.

I have participated in the development of multiple mobile apps, such as 'Prévi+' with over 18.000 users, and 'Fire Chaser' which has been featured on french national media. I brought my cybersecurity knowledge and technical capabilities to carry out these projects, keeping security in mind.

I'm used to work with a team, but also with customers. I always try to understand their needs and satisfy them

Education

MSc Cyber Security, University Of Kent, Canterbury

SEPTEMBER 2024 – PRESENT
